September 20, 2018

Dear Parents and Guardians,

As per the Federal Asbestos Hazard Emergency Response Act {(AHERA) 40CFR Part 763}, an inspection for the presence of asbestos-containing material has been completed on June 8, 2018 and an ***Asbestos Management Plan (AMP)*** has been developed for the Academy of Saint Paul.

The Inspection is routine and done in all schools each year. The report is on file in the school office and available for review by appointment during regular school office hours.

As required by the USEPA, additional inspections of the school are conducted every six months by properly accredited staff of the Archdiocese of Newark.

Sincerely,

Gail M. Ritchie, Ed. D.
Principal
